

Daily Rainfall Monitoring

The following figures show the observed rainfall in the last 15 days in Maldives.

9 Jun 2024

10 Jun 2024

11 Jun 2024

12 Jun 2024

13 Jun 2024

14 Jun 2024

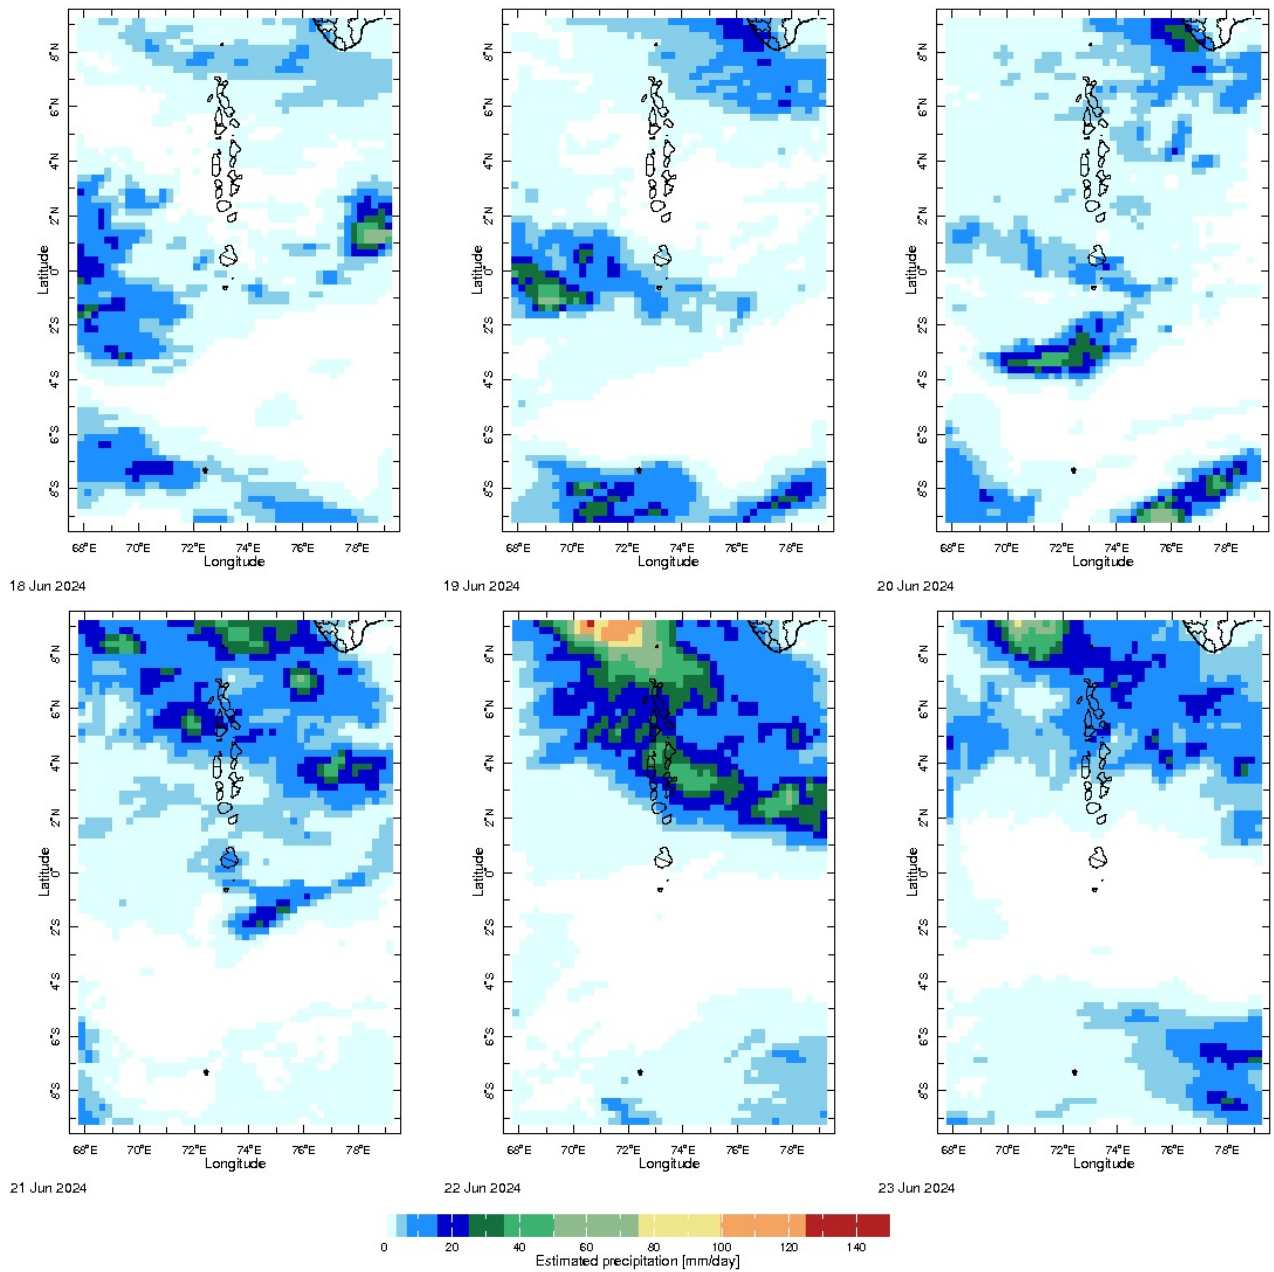

15 Jun 2024

16 Jun 2024

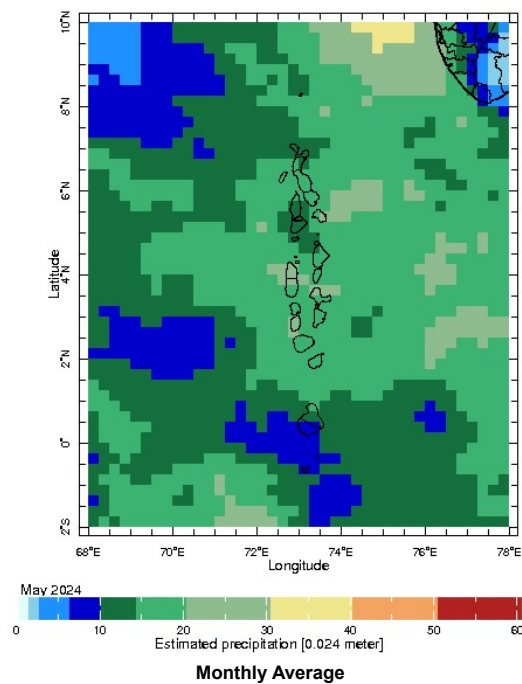

17 Jun 2024

Monthly Rainfall Monitoring

The figure shows the average observed rainfall in the previous month.

Monthly and Seasonal Monitoring

Northern Maldives:

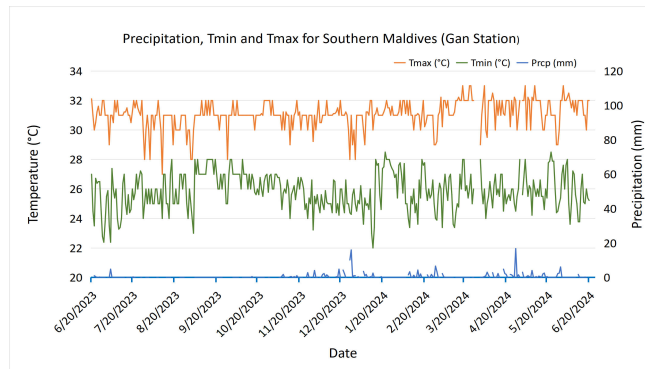

Daily Rainfall, Tmin & Tmax for the previous year in Hanimadhoo station (2023 Juneto 2024 June)

Central Maldives:

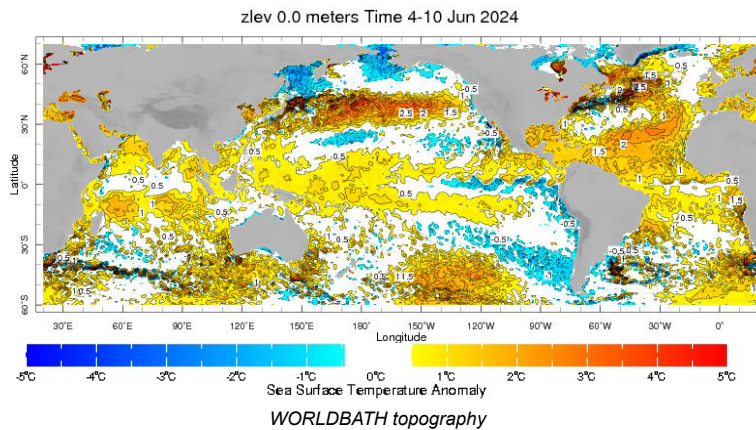

Daily Rainfall, Tmin & Tmax for the previous year in Male station (2023 Juneto 2024 June)

Southern Maldives:

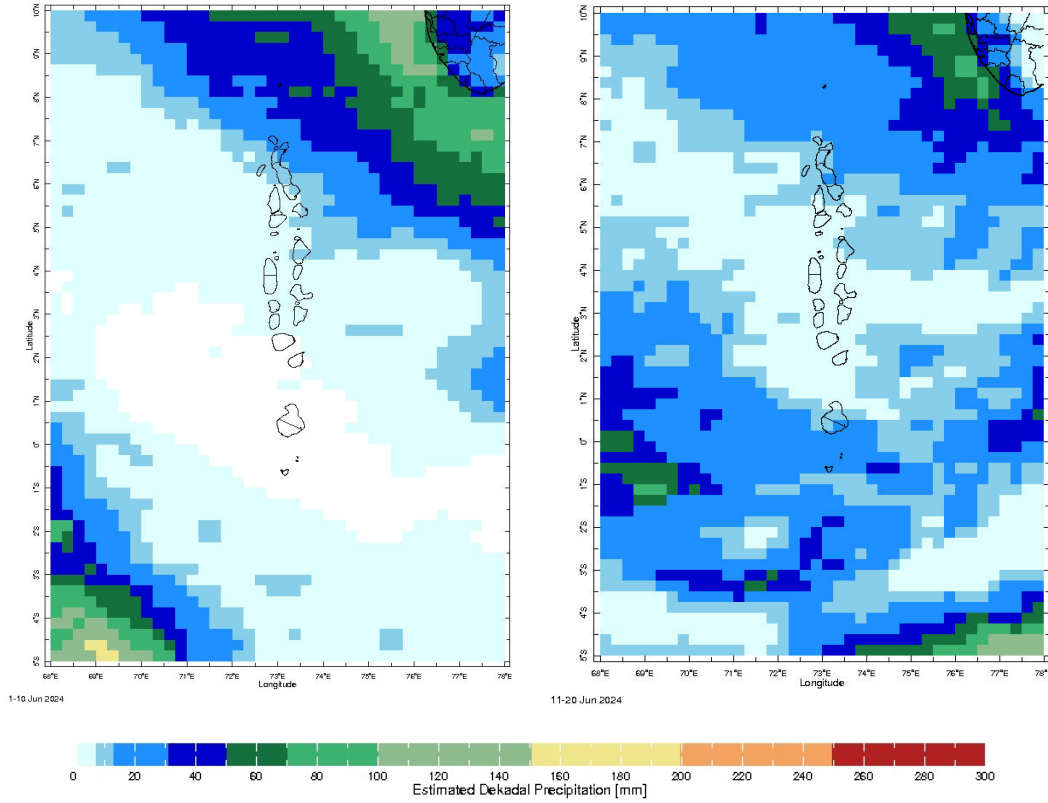

Daily Rainfall, Tmin & Tmax for the previous year in Gan station (2023 Juneto 2024 June)

Ocean Surface Monitoring

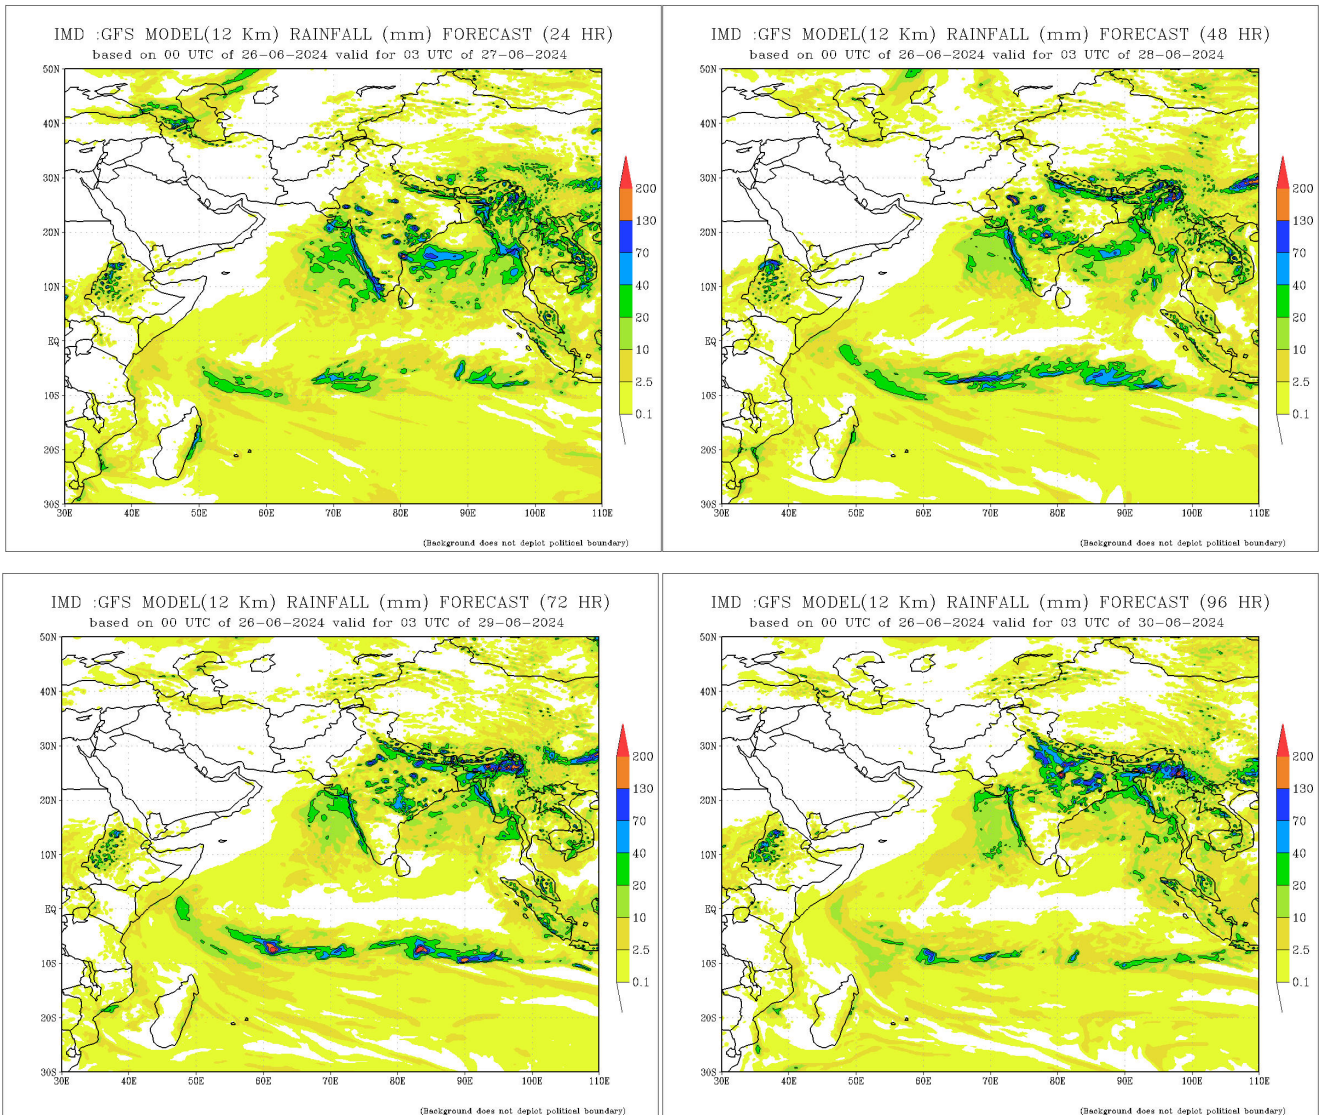

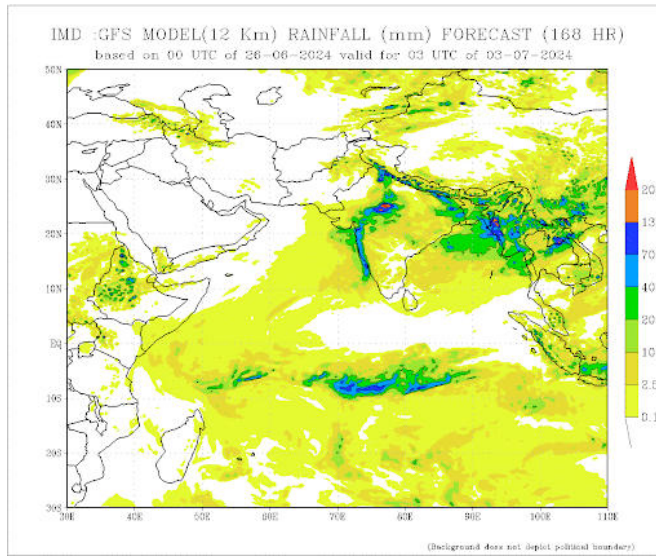

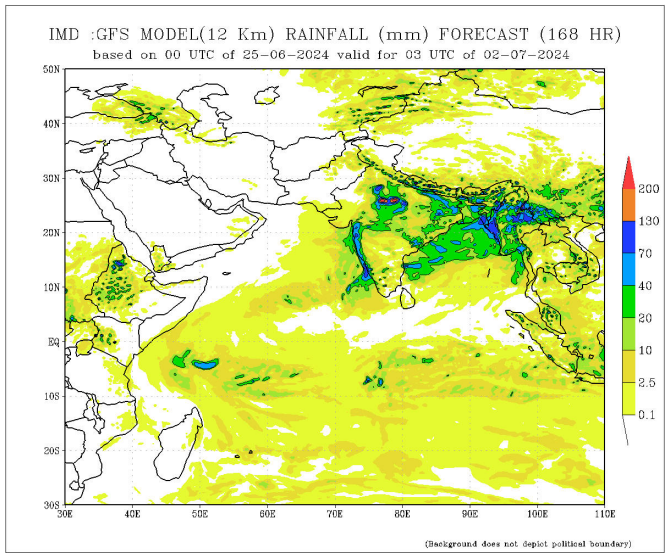

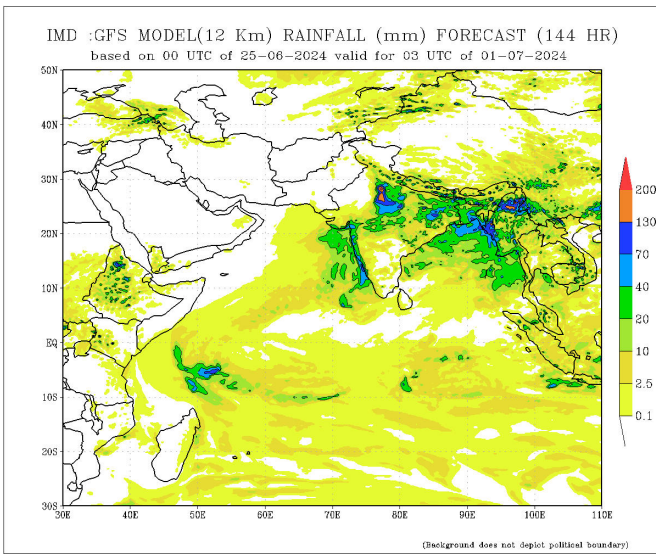

Dekadal (10 Day) Satellite Derived Rainfall Estimates

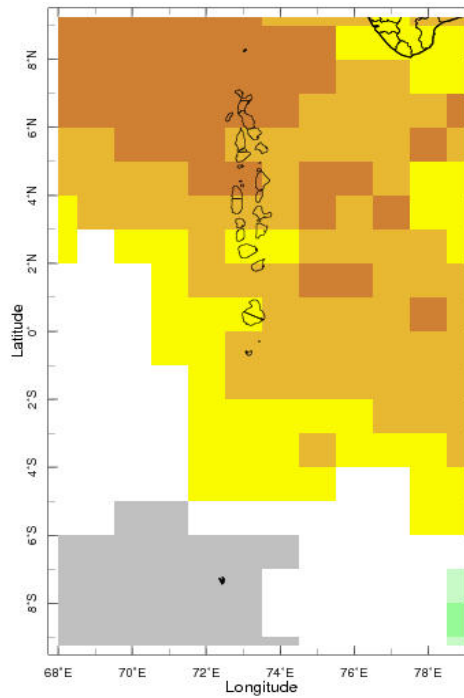

Daily Rainfall Forecast

Daily Rainfall forecasts (up to 7 days ahead) from the IMD is provided in figures below. These predictions are from the GFS (T1534) model covering the entire south Asian region.

Weekly Precipitation Forecast

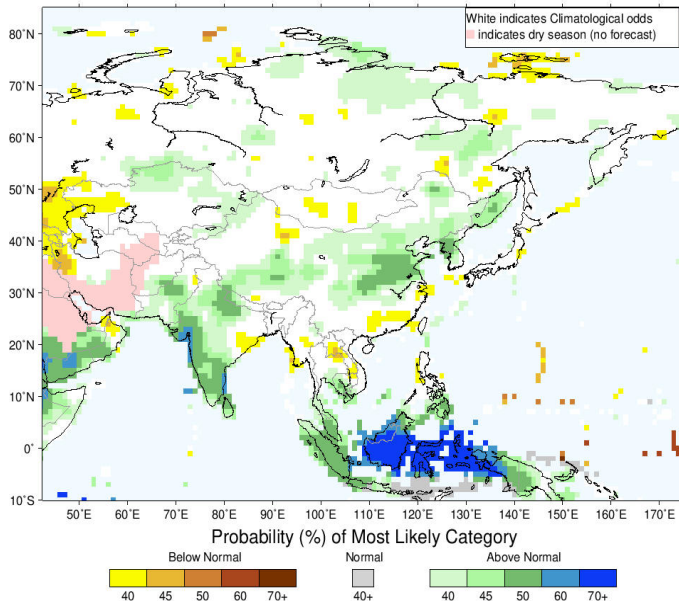

29 Jun 2024 - 12 Jul 2024 IRI SubX Precipitation Forecast issued 00Z

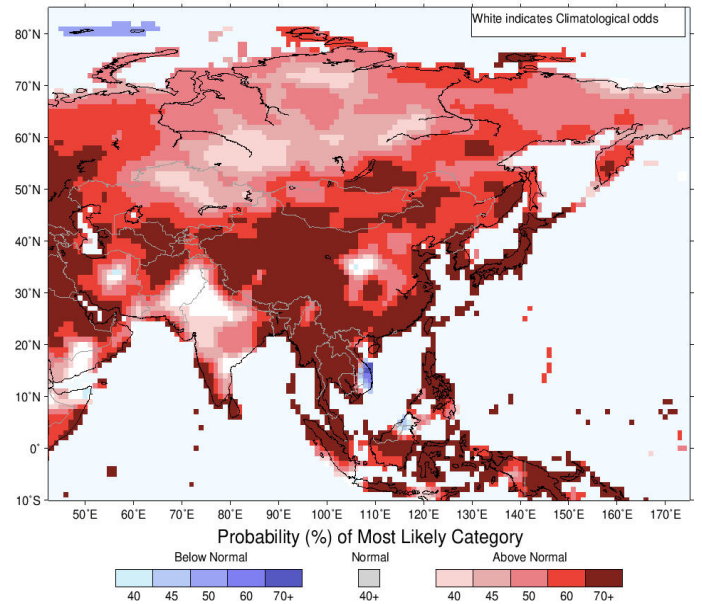

Seasonal Rainfall and Temperature Forecast

Following is the latest seasonal precipitation and temperature prediction for the next 3 months by the IRI. The color shading indicates the probability of the most dominant tercile -- that is, the tercile having the highest forecast probability. The color bar alongside the map defines these dominant tercile probability levels. The upper side of the color bar shows the colors used for increasingly strong probabilities when the dominant tercile is the above-normal tercile, while the lower side shows likewise for the below-normal tercile. The gray color indicates an enhanced probability for the near-normal tercile (nearly always limited to 40%).

IRI Multi-Model Probability Forecast for Precipitation for July-August-September 2024, Issued June 2024

IRI Multi-Model Probability Forecast for Temperature for July-August-September 2024, Issued June 2024
