

Daily Rainfall Monitoring

The following figures show the observed rainfall in the last 15 days in Maldives.

16 Sep 2024

17 Sep 2024

18 Sep 2024

19 Sep 2024

20 Sep 2024

21 Sep 2024

22 Sep 2024

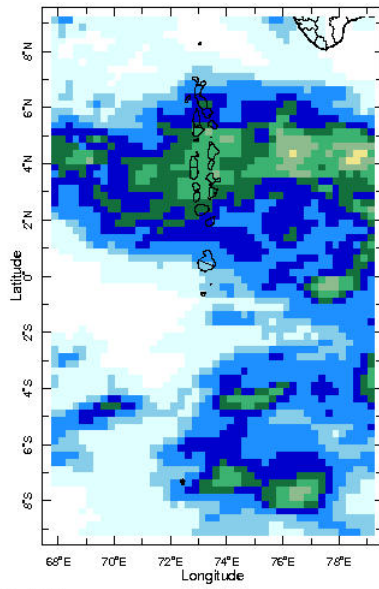

23 Sep 2024

24 Sep 2024

25 Sep 2024

26 Sep 2024

27 Sep 2024

28 Sep 2024

29 Sep 2024

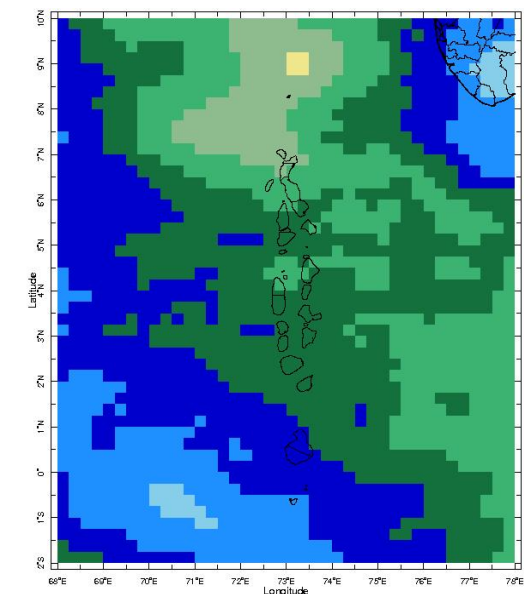

30 Sep 2024

Monthly Rainfall Monitoring

The figure shows the average observed rainfall in the previous month.

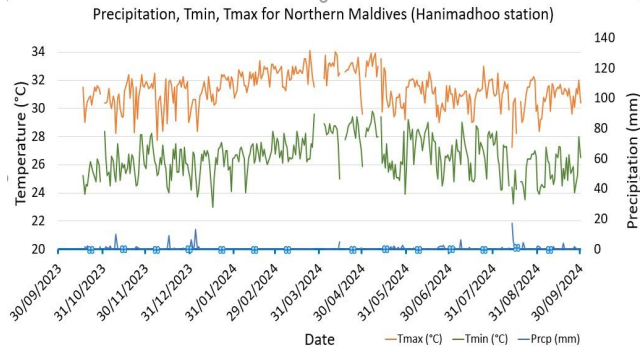

Aug 2024

Monthly Average

Monthly and Seasonal Monitoring

Northern Maldives:

Daily Rainfall, Tmin & Tmax for the previous year in Hanimadhoo station (2023 Sept to 2024 Sept)

Central Maldives:

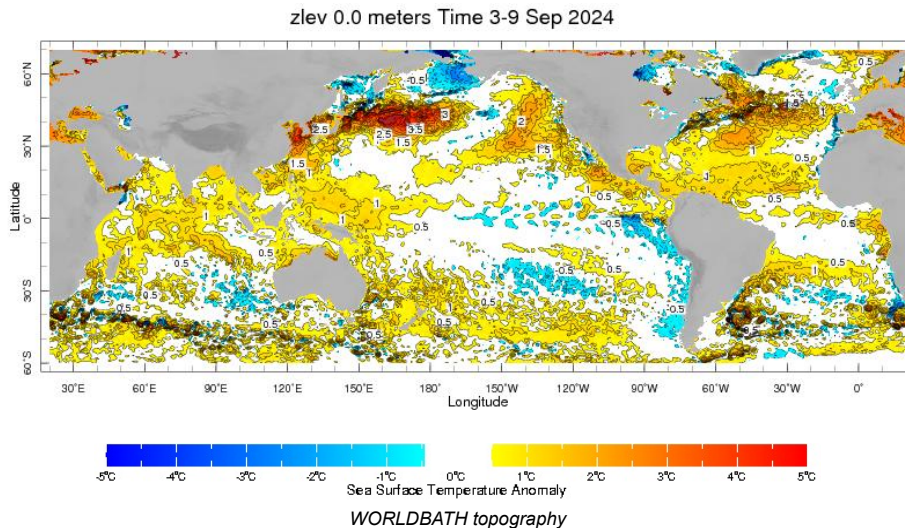

Daily Rainfall, Tmin & Tmax for the previous year in Male station (2023 Sept to 2024 Sept)

Southern Maldives:

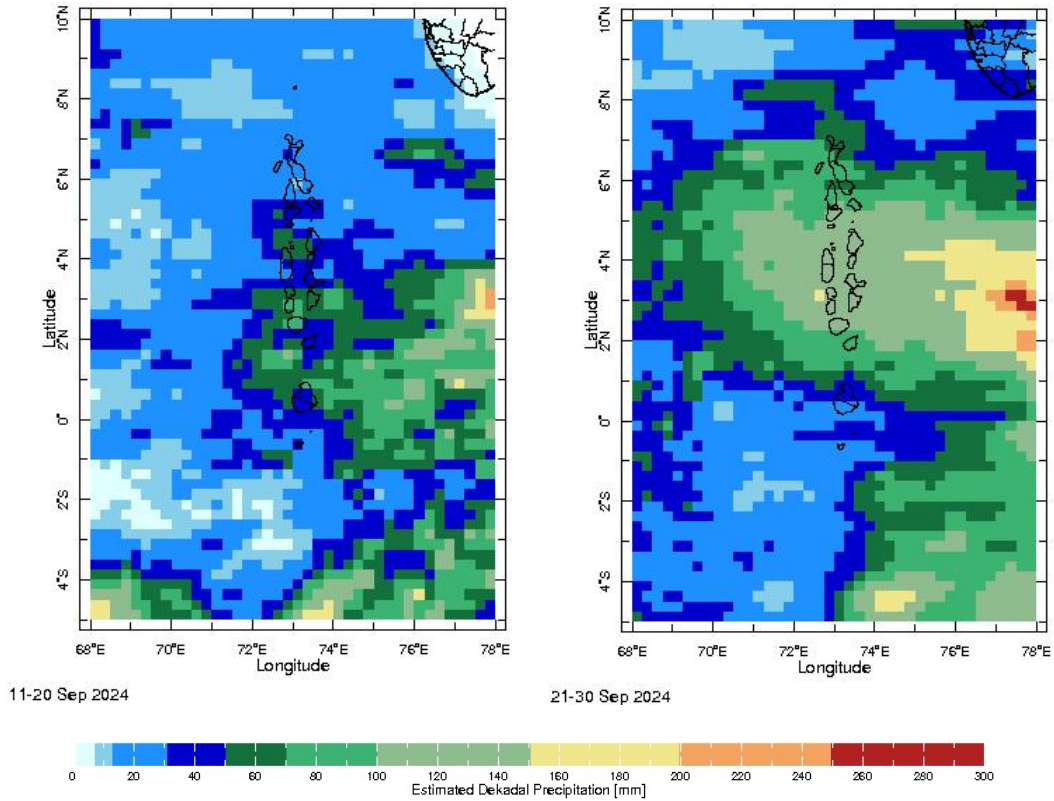

Daily Rainfall, Tmin & Tmax for the previous year in Gan station (2023 Sept to 2024 Sept)

Ocean Surface Monitoring

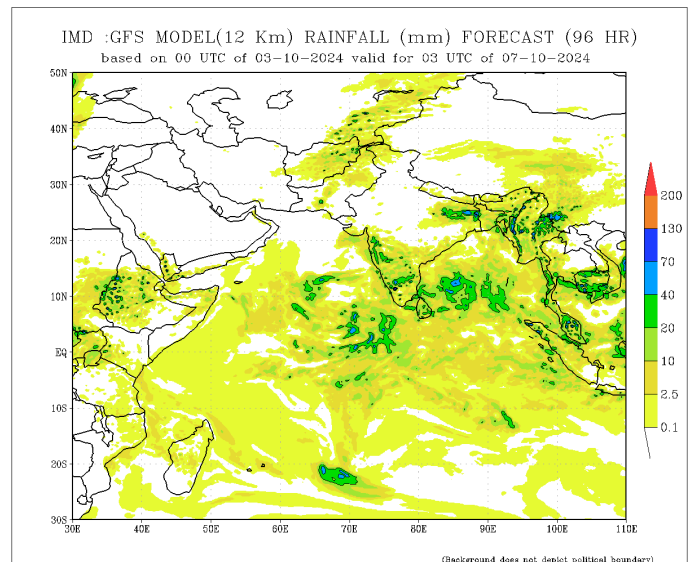

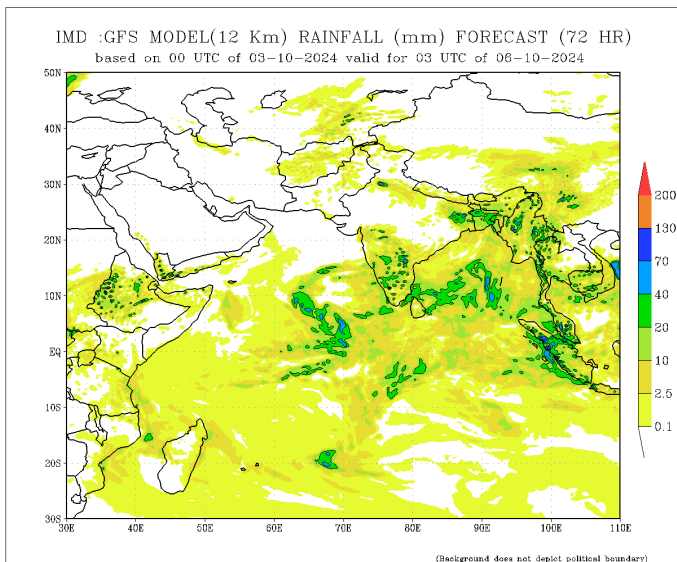

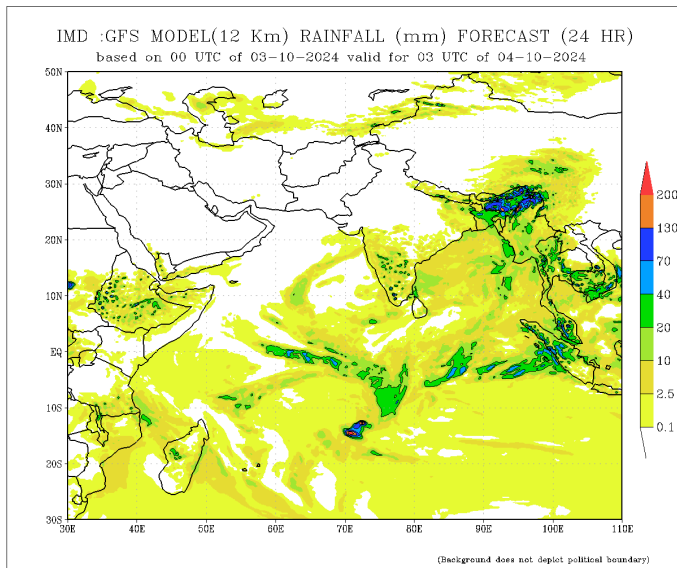

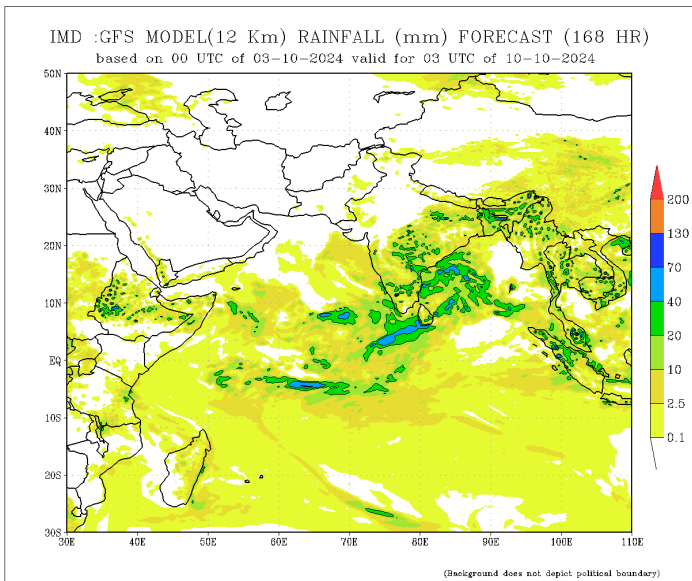

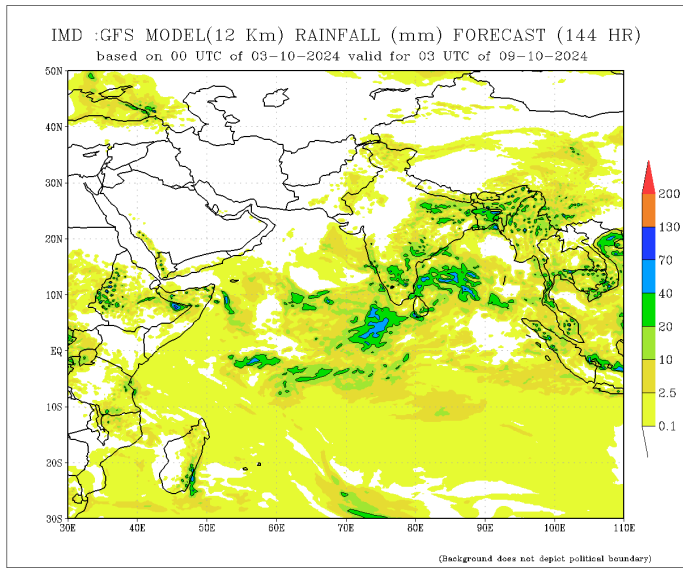

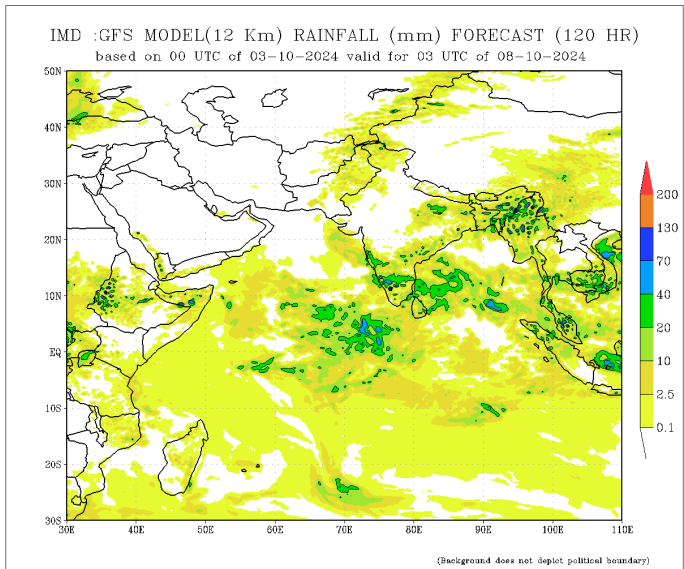

Dekadal (10 Day) Satellite Derived Rainfall Estimates

Daily Rainfall Forecast

Daily Rainfall forecasts (up to 7 days ahead) from the IMD is provided in figures below. These predictions are from the GFS (T1534) model covering the entire south Asian region.

Weekly Precipitation Forecast

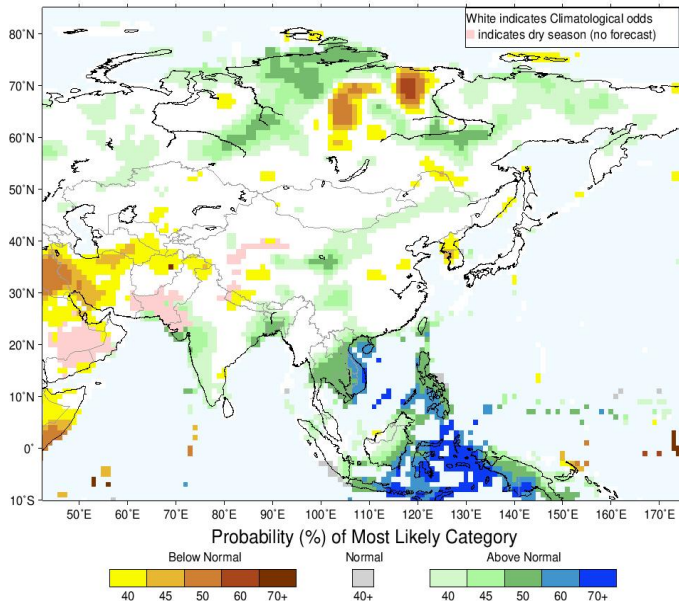

5-18 Oct 2024 IRI SubX Precipitation Forecast issued 0000 27 Sep 2024

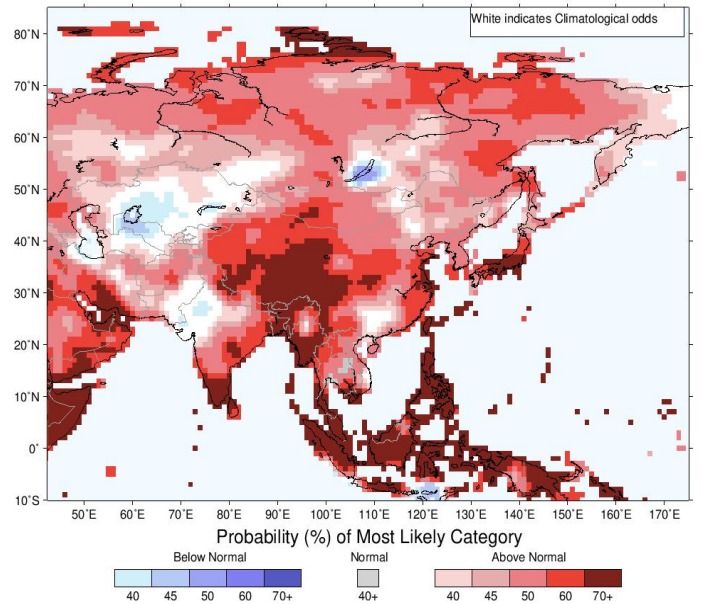

Seasonal Rainfall and Temperature Forecast

Following is the latest seasonal precipitation and temperature prediction for the next 3 months by the IRI. The color shading indicates the probability of the most dominant tercile -- that is, the tercile having the highest forecast probability. The color bar alongside the map defines these dominant tercile probability levels. The upper side of the color bar shows the colors used for increasingly strong probabilities when the dominant tercile is the above-normal tercile, while the lower side shows likewise for the below-normal tercile. The gray color indicates an enhanced probability for the near-normal tercile (nearly always limited to 40%).

IRI Multi-Model Probability Forecast for Precipitation for October–November–December 2024, Issued September 2024

IRI Multi-Model Probability Forecast for Temperature for October–November–December 2024, Issued September 2024
