

# FOUNDATION FOR ENVIRONMENT CLIMATE AND TECHNOLOGY

## VACANCY: Web Developer

We are looking to hire a versatile, reliable and conscientious individual skilled in web development, system administration, and is willing to be a team player to support a non-profit scientific, engineering and socio-economic research enterprise. A person who possesses a Diploma / B.S in Computer Science, Information Technology or equivalent experience is preferred.

### Essential Skills:

- Scientific programming languages and ability to pick up new skills as needed.
- Knowledge and expertise in PHP & MySQL
- SQL query skills in MySQL
- HTML & CSS Skills
- Wordpress content management system (should understand the Workflow, site map, usability and aesthetics) and user experience orientation
- Knowledge in javascript and Ajax like frameworks
- Aesthetic sensibilities in web development is needed.
- Good writing skills in English
- Ability to learn quickly as needed.
- Documentation, Record Keeping and communication skills
- Ability to help less skilled staff.

### Preferred skills

- Competency in image processing, GIS, desktop publishing and other scientific software
- Proficiency in Adobe Photoshop & Macromedia Dreamweaver will be an added advantage

The best fit is a person with good interpersonal skills who is adaptable and flexible and can handle tasks in multiple areas. The motivated individual who is able to fulfill these tasks has the opportunity to undertake research in areas of scientific computing in interaction with skilled scientists and social scientists and associated staff. The assignment is to commence immediately. The job is to be full time on contract basis, in Digana Village and in office around Kandy. To apply, send (1) a resume (2) names of two professional referees who are familiar with your work, and (3) a statement as to why you are interested in this position by the deadline to:-
