EXPERIMENTAL CLIMATE MONITORING AND PREDICTION

By: Ruchira Lokuhetti, Divaskar Sathyendra, Chayana Gunathilake, Lareef Zubair and Michael Bell¹ (FECT and IRI¹)

HIGHLIGHTS

Rainfall Forecast

- The NOAA weekly rainfall forecast predicts up to 25 mm of total rainfall in most parts of the island during 9 - 14 Mar.

Monitored Rainfalls

- Between 4 - 9 Mar: up to 50 mm of rainfall was recorded in Ratnapura district on the 9th.

Monitored Wind

- From 3 - 9 Mar: up to 10 km/h, easterly winds were experienced by the entire island.

Monitored Sea Surface

- 0.5 °C above average sea surface temperature was observed in the seas around Sri Lanka.

Monitoring

Rainfall

Weekly Monitoring

Date	Rainfall
4 th March	No Rainfall.
5 th March	Up to 30 mm Galle and Ratnapura districts; and up to 20 mm in Kalutara district.
6 th March	Up to 20 mm Ratnapura and Kalutara districts; and up to 10 mm in most parts of the island.
7 th March	Up to 10 mm Puttalam, Mannar, Kilinochchi, Vavuniya, Trincomalee, Anuradhapura, Polonnaruwa, Kurunegala, Matale, Kandy, Kegalle, Gampaha and Colombo districts.
8 th March	No Rainfall.
9 th March	Up to 50 mm Ratnapura district; and up to 20 mm in Nuwara Eliya district.

Total Rainfall for the Past Week

The RFE 2.0 tool shows total up to 25-50 mm in Ratnapura, Kalutara and Galle districts; and up to 10-25 mm in Kurunegala, Kegalle, Nuwara Eliya, Gampaha, Colombo and Matara districts. Below average rainfall up to 10-25 mm for Trincomalee, Anuradhapura, Polonnaruwa, Matale, Kurunegala and Puttalam districts; and up to 10-25 mm in most parts of the island.

Monthly Monitoring

During February – Above average rainfall conditions up to 150 mm were experienced by several regions of Mannar district. Below average rainfall conditions up to 240 mm were experienced by Polonnaruwa, Batticaloa, Ampara, Monaragala, Nuwara Eliya, Kegalle, Ratnapura, Gampaha, Colombo, Kalutara and Galle districts; and up to 150 mm in rest of the island. The CPC Unified Precipitation Analysis tool shows up to 75 mm were experienced by Mannar, Anuradhapura, Batticaloa and Ampara districts; and up to 50 mm in Polonnaruwa, Monaragala, Hambantota, Galle and Kalutara districts.

Ocean State (Text Courtesy IRI)

Pacific sea state: February 18, 2020

SSTs in the east-central Pacific were neutral, but above average during mid-February. Patterns in atmospheric variables are split between neutral and weak El Niño conditions. Most model forecasts favor warm-neutral SST conditions during spring, cooling to average by early summer. The official CPC/IRI outlook is consistent with these model forecasts, calling for continuation of ENSO-neutral.

Indian Ocean State

0.5 °C above average sea surface temperature was observed in the seas around Sri Lanka.

Predictions

Rainfall

14-day prediction: NOAA NCEP models

From 11th – 17th Mar: Up to 25 mm of total rainfall in most parts of the island.

From 18th – 24th Mar: No Rainfall.

NOAA Model Forecast:

From 4th – 9th Mar: Total rainfall up to 25 mm is expected in most parts of the island.

MJO based OLR predictions

For the next 15 days:

MJO shall suppress the rainfall in Sri Lanka.

Weekly Hydro- Meteorological Report for Sri Lanka

Inside This Issue

1. Monitoring

- a. Daily Rainfall Monitoring
- b. Monthly Rainfall Monitoring
- c. Dekadal (10 Day) Satellite Derived Rainfall Estimates
- d. Weekly Average SST Anomalies

2. Predictions

- a. NCEP GFS Ensemble 1-14 day Rainfall Predictions
- b. WRF Model Rainfall Forecast from IMD Chennai
- c. Weekly Precipitation Forecast from IRI
- d. Seasonal Predictions from IRI

MONITORING

Daily Rainfall Monitoring

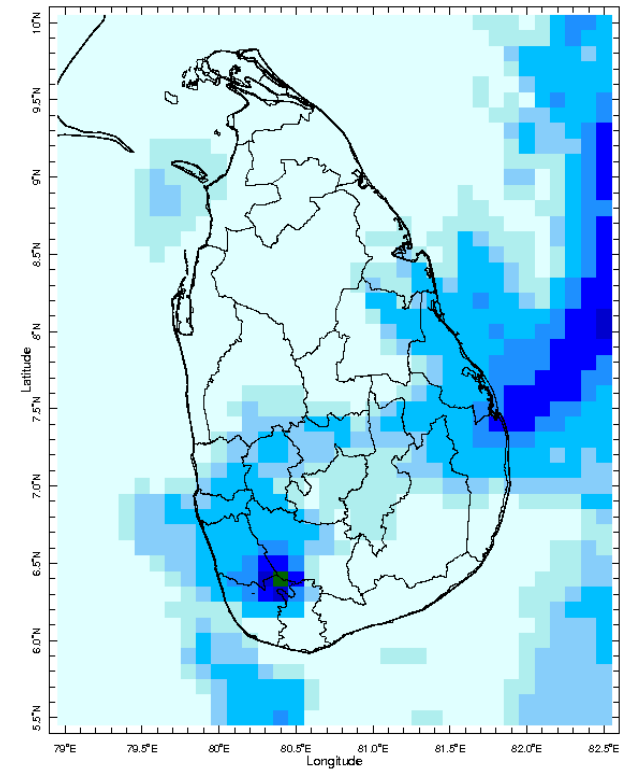

The following figures show the satellite observed rainfall in the last 7 days in Sri Lanka.

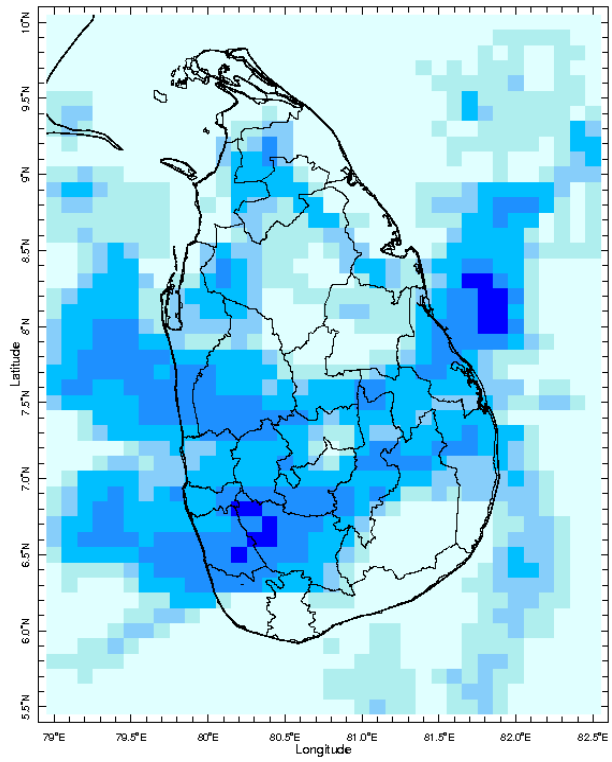

3 Mar 2020

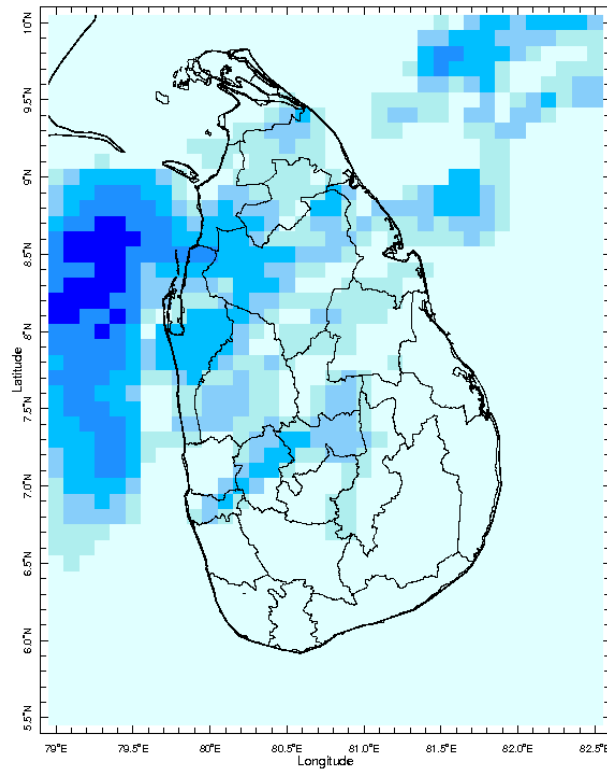

4 Mar 2020

5 Mar 2020

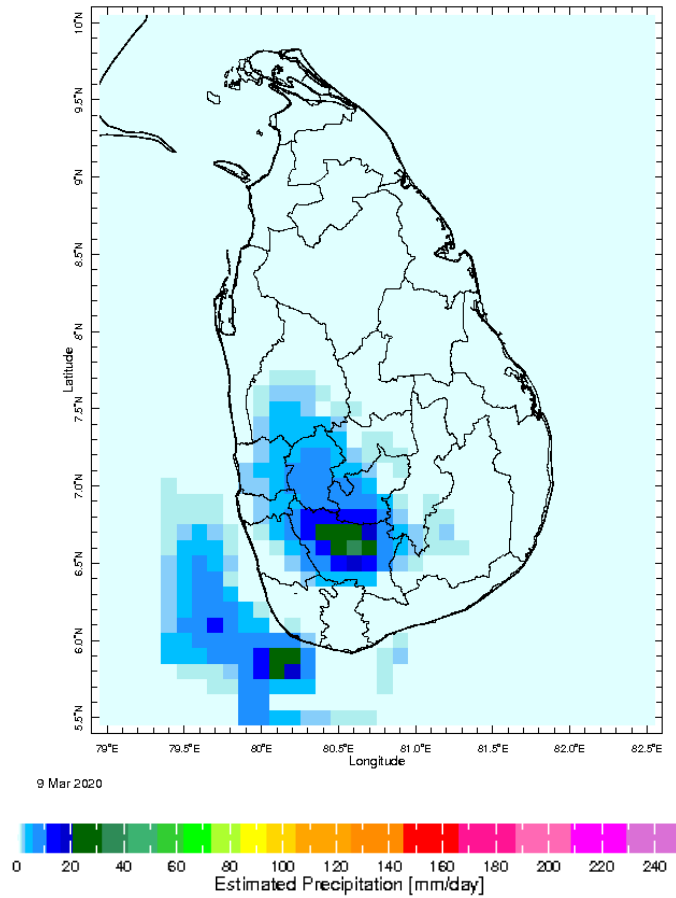

6 Mar 2020

7 Mar 2020

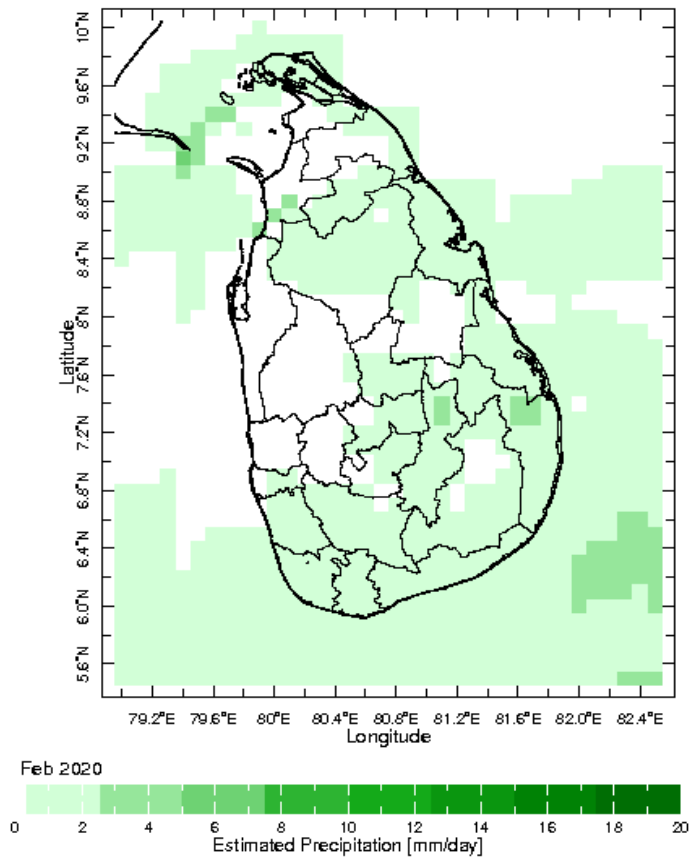

8 Mar 2020

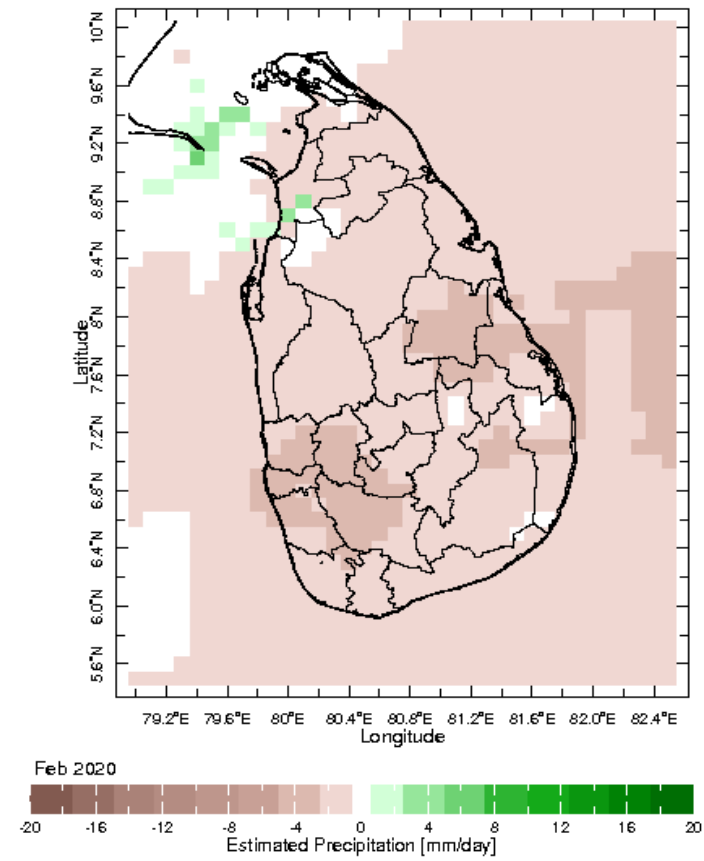

Monthly Rainfall Monitoring

The figure in the left shows the average observed rainfall in the previous month. The rainfall anomaly in the previous month is shown in the figure to the right. The brown color in the anomaly figure shows places which received less rainfall than the historical average while the green color shows places with above average rainfall. Darker shades show higher magnitudes in rainfall

PREDICTIONS

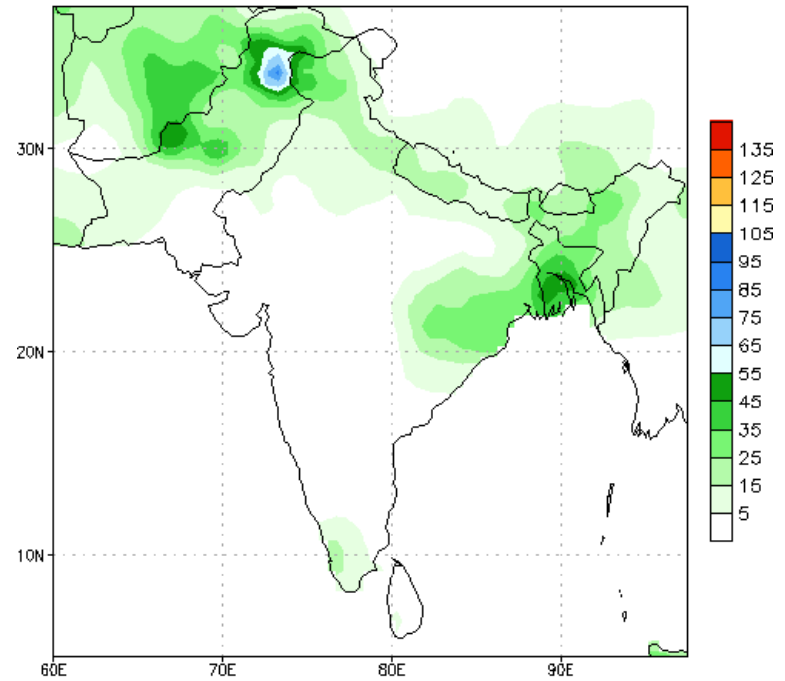

NCEP GFS 1- 14 Day prediction

NCEP GFS Ensemble Forecast 1-7 Day Precipitation (mm)
from: 11Mar2020
11Mar2020-17Mar2020 Accumulation

Bias correction based on last 30-day forecast error

NCEP GFS Ensemble Forecast 8-14 Day Precipitation (mm)
from: 11Mar2020
18Mar2020-24Mar2020 Accumulation

Bias correction based on last 30-day forecast error

WRF Model Forecast (from IMD Chennai)

Total rainfall forecast from the IRI for next six days is provided in figures below. The figure to the left shows the expectancy of heavy rainfall events during these six days while the figure to the right is the prediction of total rainfall amount during this period.
