

Introduction

The Tropical Climate is registered as a non-profit organization with the Registrar of Companies of Sri Lanka as a "Guarantee Company" under Section 34 of the Companies Act of 2007 as a Charitable Organization for the Public Welfare.

Future Goals

- Provide and organize aid and relief programs in times of disaster.
- Help and provide services for the poor and vulnerable.
- Conduct school awareness programs on dengue, climate and environment in Kundasale Divisional Secretariat.
- Conduct community awareness programs on dengue, climate, solid waste management, and disaster management in the Kundasale Divisional Secretariat.
- Install weather station in Digana area and make data accessible to the general public through websites, flyers and bulletins.
- Conduct climate and environment research and climate adaptation projects
- Monitor weather, soil moisture and air pollution in Kundasale Divisional Secretariat.

Objectives

- To aid and assist affected people in times of disaster.
- To provide services for the poor and vulnerable.
- To undertake research, training and education on environment, social and economic information in tropical locations and to provide services in these areas.
- To provide services in research, development, and dissemination on sectors such as environment, disaster management, health, fisheries and energy
- To advise on use of climate and socio-economic information to propose, design, and implement adaptation measures and technology.
- To plan and give technical guidance on climate hydrological and environmental monitoring and prediction, impact assessment and adaptation.
- To train and educate on the vulnerability of ecosystems to undertake work that understand factors underpinning such vulnerability
- To undertake research and services on ancient and future climates and their impacts on ecosystems and its implications for sustainable development.
- To undertake scientific, educational and other publishing in multiple media provided the Association does not engage in primary and secondary education.

About Us

Vision

To generate and use research for the benefit of society and environment particularly which is vulnerable.

Mission

As a charitable organization we conduct research on problems of interest to the community and for the protection of the environment. For this we seek to sustain think tank and center of excellence in climate, environment and information with quality research to address societal concerns and ecological protection.
